Canada - Private Rental GPS Electronic Monitoring Program

Who is SafeTracks® GPS Canada Inc

SafeTracks was incorporated in Alberta in 2009. Since our beginning, SafeTracks core vision has been to provide GPS Electronic Monitoring (EM) products and Monitoring Centre services to local, federal, and provincial governmental and policing agencies within the criminal justice and correctional arena. Many of these programs have been custom developed for specific requirements. SafeTracks is the Canadian leader in providing end-to-end GPS location monitoring and predictive behavioral solutions that combine real-time tracking devices and professional monitoring services with advanced data analytics. SafeTracks has been extremely diligent with the selection of the GPS Electronic Monitored technology and architecture to ensure that we provide the Canadian EM market with the best tools for various applications. SafeTracks Canadian Monitoring Centre Certified Response Specialists are APCO certified and undergo extensive training to ensure the highest quality experience available 24/7/365. We are inclusive and with a translation service for over 170+ languages allow Participants to communicate in their language of choice.

SafeTracks - Rehabilitate, Reintegrate, Resolve.

There is an opportunity for incarcerated individuals to apply to the courts to be released under conditions of house arrest on a SafeTracks GPS Ankle Bracelet. Authorization is reflected both in the relevant legislation and through Court rulings upholding it as an appropriate tool under the generic 'other reasonable conditions' provisions. Defense Lawyers can petition the courts or releasing authority for their clients to be released on conditions that incorporate the use of GPS Electronic Monitoring for the Release of an individual for one of the following applications:

- **Bail** (judicial interim release) - An order made to release a person prior to an official case disposition (pre-trial or pre-sentencing/appeal) or enforcement (deportation/extradition).
- **Sentencing** - A kind of non-custodial court ordered case disposition (conditional discharge, probation, conditional sentence). Sentences of two years or more are served in federal penitentiaries while sentences of less than two years are served in provincially administered prisons. Persons denied bail are held in 'remand' facilities which are also provincially administered.
- **Conditional Release** - A statutorily authorized early release from a court ordered sentence (temporary absence, parole, statutory release, long term offender order).
- **Preventive Orders** - Also known as 'peace bonds', this circumstance is a tailored court order and are based on a historical preventive authority that is available on defined evidentiary grounds to prevent the commission of harm, including in DV or threats of DV circumstances.

As per this introduction to the SafeTracks Private Rental Program, SafeTracks will provide all documentation required to make sure your experience to seek conditional release for your client is seamless. Such a program has shown to assist with rehabilitation, allows your client to continue to work and support their families, and limits your client's exposure to potentially worse behaviors and habits, all the while creating an environment of accountability. **SafeTracks is proud to state that we have a 95% rate of Participant release when our Private Rental Program is utilized.**

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

While we are always prepared to testify if required, we respectfully encourage counsel to use these materials, our answers to questions provided in advance, and balanced agreed statements of fact as the evidence relating to our programs. When testimony is required, we encourage counsel to consider requesting that the court permit us to provide testimony by telephone or video, when required. **The fee for this is \$350.00 for the first hour, and \$100.00 per hour thereafter.**

We provide this information to assist the Participant and their counsel in determining whether to include our program in a proposed plan, to assist the Crown in determining its position, and to assist the court.

In the following sections, we present information that is common to our criminal law program regardless of which technology is used, summaries of how each of our technologies works, and information intended to assist in the creation of conditions when monitoring is being made part of an order.

We will provide the Crown with evidence to support a revocation, breach, variation, or treatment proceeding at no cost to the Crown, including testimony if required.

SafeTracks GPS Ankle Bracelet Private Rental Program – Technology & Actions

SafeTracks Private Rental Program utilizes the most modern Electronic Monitoring Innovation that is available around the world. Once the SafeTracks GPS Ankle Bracelet is affixed to the Participant, the essential functions are available, which include:

- a) SafeTracks Private Rental Program use a one-piece GPS Offender Monitoring Device (hereinafter referred to as the “Monitoring Device”) to monitor and track Participants released on Court Ordered Electronic Monitoring. The Monitoring Device is a hardened plastic encased leg cuff which incorporates strapping with embedded fiber-optics. The Monitoring Device tracking and monitoring system is attached to the cuff. The Participant must charge the monitoring device daily.
- b) The Monitoring Device tracks the Monitoring Device movements in real time. The Participant is monitored 24 hours per day, 7 days per week, 365 days per year. It works in conjunction with the SafeTracks/Northern 911 24/7/365 **“LIVE MONITORING CENTRE”** and the Software (hereinafter referred to as the “Monitoring Service”).
- c) If the Participant violates any of the Court Ordered release conditions the Monitoring Service will activate any and all of our predetermined protocols that are related to this particular Participant.
- d) Breach Alerts are displayed on the SafeTracks GPS Electronic Monitored Software’s Dashboard where our Monitoring Centre Team will be able to **“VALIDATE”** the noted Breach and will action them as per the Protocols that are set forth for this particular Participant. If requested or required, the SafeTracks GPS Electronic Monitoring Software will generate Alerts to whomever is deemed necessary to receive these Alerts, via Email/SMS. The interested parties may include the following:
 - Participant
 - Surety
 - Probation Officer
 - Police
 - Defense Council
 - Crown Prosecutor

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

e) The SafeTracks GPS Electronic Monitoring Software will generate a Breach Alert that will be actioned by the SafeTracks professional monitoring team (SMT). These Breach Alerts are actioned in conjunction with the strict Court Ordered Release Condition. We take those and create “Protocols”. These Alerts and Protocols are as follows but can be modified to comply with specific Court Release Conditions:

EVENT	PROTOCOLS
<p>LOW BATTERY</p>	<ul style="list-style-type: none"> • When the ankle monitor reaches less than 20% battery power remaining, the ankle monitor will generate the “Battery alert. You must immediately charge your device as directed” audio command for the Participant. At this time, the SafeTracks Monitoring center will also be alerted to the event and will initially wait 60 minutes allowing the alert to automatically clear if charging has begun. • If no charging has occurred in this time the SafeTracks Monitoring center will call the Participant and advise them that they must immediately charge their device, after the call, the SafeTracks Monitoring center will wait an additional 60 minutes, allowing the alert to automatically clear if charging has begun. • If no charging has occurred in this time, the SafeTracks Monitoring center will call the Participant and advise them that they must immediately charge their device, after the call, the SafeTracks Monitoring center will wait an additional 30 minutes, and if no charging has been detected the SafeTracks Monitoring center will call the nearest police department to the Participant’s location and requests a police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
<p>ADVOCATE GBV/DV/IPV APP MOBILE EXCLUSION ZONE BUFFER ENTERED</p>	<ul style="list-style-type: none"> • When the Mobile Exclusion Buffer zone is entered, the SafeTracks Monitoring center will call the Participant and instruct them to leave the area immediately.
<p>ADVOCATE GBV/DV/IPV APP MOBILE EXCLUSION ZONE ENTERED</p>	<ul style="list-style-type: none"> • When a Mobile Exclusion zone is entered, the SafeTracks Monitoring center contacts the nearest police department to the Participant’s GPS location and requests a Police response. • Next, the SafeTracks Monitoring center will call the Participant and instruct them to leave the area immediately. • SafeTracks to notify interested parties of the breach and of the actions taken.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

EVENT	PROTOCOLS
EXCLUSION ZONE ENTERED	<ul style="list-style-type: none"> • When an Exclusion zone is entered, the SafeTracks Monitoring center contacts the nearest police department to the Participant’s GPS location and requests a Police response. • Next, the SafeTracks Monitoring center will call the Participant and instruct them to leave the area immediately. • SafeTracks to notify interested parties of the breach and of the actions taken.
EXCLUSION BUFFER ZONE ENTERED	<ul style="list-style-type: none"> • When an Exclusion Buffer zone is entered the SafeTracks Monitoring center will call the Participant and instruct them to leave the area immediately.
FAILED TO ENTER INCLUSION ZONE	<ul style="list-style-type: none"> • If the Participant fails to enter a designated Inclusion zone, the SafeTracks Monitoring center will run an instant locate on the ankle monitor to verify that the device is not within the inclusion zone. • If the GPS coordinates are not within the zone, the SafeTracks Monitoring center will call the nearest police authority to the Participant’s location and request a police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
UNAPPROVED LEAVE	<ul style="list-style-type: none"> • If the Participant leaves their Home Inclusion zone while not permitted, the SafeTracks Monitoring center will run an instant locate on the ankle monitor to verify that the device is not within the inclusion zone. • If the device is not within the inclusion zone, the SafeTracks Monitoring center will call the Participant and advise that they are in breach of their schedule and need to return home immediately. • The SafeTracks monitoring center will then wait 5 minutes and then perform a second instant locate. If the device is not within the home zone at that time, the SafeTracks Monitoring center will call the nearest police department to the Participant’s location and request a police response. • SafeTracks to notify interested parties of the breach and of the actions taken.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

EVENT	PROTOCOLS
STRAP TAMPER	<ul style="list-style-type: none"> • If the ankle monitor detects any form of tampering with it's strap, the SafeTracks Monitoring center will be notified and will call the nearest police department to the location of the Participant and request an immediate police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
DEVICE TAMPER	<ul style="list-style-type: none"> • If the ankle monitor detects any form of tampering, the SafeTracks Monitoring center will be notified and will call the nearest police department to the location of the Participant and request an immediate police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
COMMUNICATION LOSS	<ul style="list-style-type: none"> • If the ankle monitor loses its ability to transmit location data, the SafeTracks Monitoring center will begin to diagnose the issue and attempt to restore communication with the device. • If the SafeTracks Monitoring center is unable to regain communication, they will contact the nearest police department to the last location from the device and request a police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
RADIO FREQUENCY HOME UNIT TAMPER	<ul style="list-style-type: none"> • If the Radio Frequency Home Unit detects any form of tampering, the SafeTracks Monitoring center will be notified and will call the nearest police department to the residency of the Participant and request an immediate police response. • SafeTracks to notify interested parties of the breach and of the actions taken.
RADIO FREQUENCY HOME UNIT MOTION WITH POWER DISCONNECT	<ul style="list-style-type: none"> • If the Radio Frequency Home Unit detects that is has been moved and that its power cord has been disconnected from the wall, the SafeTracks Monitoring center will be notified and will call the nearest police department to the residency of the Participant and request an immediate police response. • SafeTracks to notify interested parties of the breach and of the actions taken.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

- f) In addition to GPS, the Monitoring Centre also has the ability to communicate with the Monitoring Device, Text to Voice communication that allows SafeTracks Operators and Agency Officers to contact the Participant at any time providing real time intervention and monitoring. It also incorporates an onboard 90 dB Siren. The SafeTracks Monitoring Centre as part of a violation protocol, or agency officers via the software, can activate the Siren. The siren would alert victims and the public to an Offender Violation. It can assist Police Officers with Offender recovery and improves public safety.
- g) If the Participant is released with Court Ordered Electronic Monitoring, then the Participant must sign a Consent and Release of Personal Information that allows SafeTracks and our strategic partners to provide to Law Enforcement Agencies including, but not limited to, Canada Justice, All Provincial and Territorial Justice Department of Justice-Canada, the RCMP, INSET, Local and City Policing Authorities, Provincial, Municipal and First Nations' Police Services, Canadian Border Services Agency (CBSA), and Canada Customs and Revenue Agency (CCRA) with the Participant's personal information.
- h) The Participant's personal information is any audio, visual, or written recorded information about the Participant including, but not limited to, times, dates, and location of the Participant, information provided by the Participant on the GPS Electronic Monitoring Service Intake Form, any definitions included in s.1(n) of FOIP, and any and all other information which may be recorded, collected, or stored by SafeTracks in connection with the GPS Electronic Monitoring relative to the Participant.
- i) In the SafeTracks GPS Monitoring Software, Electronic Geo-Zones can be created and stored on the GPS Ankle Bracelet and the SafeTracks Monitoring Software. 300 Zones can be created which are commonly referenced to as Inclusion Zones, where the Participant **"MUST"** remain within, or an Exclusion Zone, where the Participant is **"NOT"** allowed to enter. All these Geo-Zones can be programmed to maintain compliancy and accountability 24/7/365. These Geo-Zones can be scheduled to allow the Participants to **"LEAVE"** an Inclusion Zone, when approved.
- j) SafeTracks can set a digital perimeter around a residential, office, school, work, family properties to monitor Court Ordered Protection Orders. If the Participant Violates this perimeter, again this will trigger a Breach Alert, whereas the Monitoring Service will contact the nearest Police of Jurisdiction to dispatch and apprehend. These are called **Exclusion Zones**. They can be used for Intimate Partner Violence (IPV), Witness Protection, or High-Risk Sexual Offenders.
- k) If required for Work or Education, or other travel itineraries, SafeTracks can create a set a digital perimeter of Inclusion on the specific route the Participant **"MUST"** take. If this route is not observed, an Alert will be generated, and the Police of Jurisdiction will be contacted, and advised of known Breach.
- l) If the Participant is Court Ordered to have the Monitoring Device installed before their release from a remand center, then a representative from SafeTracks and or our agents can attend the remand center and have the device installed before release. We have the capabilities to install Monitoring Devices Canada wide.
- m) If the Participant attempts to Tamper with the GPS Monitoring Device or attempts to remove and abscond, the SafeTracks Monitoring Service will immediately report this to the closet police as a violation of the Release Order and request the Police to be dispatched.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

- n) The SafeTracks Monitoring Service when required to contact Police Departments across Canada, utilizes the **PUBLIC SAFETY ANSWERING POINT (PSAP)**. PSAP is a Call Centre Service where Emergency Calls for Police, Fire or Ambulance are sent. In the case of our Monitored Devices, the initial alert/call comes into our Monitoring Service and once the address is received and validated, the PSAP for that address is determined and the call is connected via **PRIMARY TRUNKS** to the Police of jurisdiction via 3-way conference.
- o) The Monitoring Device uses the Global Positioning System (GPS) to record its location every minute. This collected data is then sent to the servers. This Data will provide a continual record of the locations of the Participant throughout the day. The Monitoring Device communicates with SafeTracks servers using Cellular communication. SafeTracks uses SIM technology with prominent Canadian Cellular providers. The Monitoring Device transmits and receives information to and from a specified server on the internet by way of the cellular GSM network using GPRS (General Packet Radio Service.) All transmitted information is securely encrypted, including location records, alarm notifications, configuration data and remote alert commands sent to the device from the server. The transmitted data would include, but not limited to, location, GPS strength, Cellular Connectivity, Battery Levels, Breach Alerts and much more.
- p) The GPS accuracy is 6ft (1.8m) in optimal conditions (outdoors) and 50ft (15m) under normal operations. The Triangulation is the secondary location technology that is automatically used when the device loses the GPS signal. This is generated based upon signal strength in relation to each cell tower. Each cell tower provides its location coordinates and signal strength. The more cell towers in range, the more precise triangulation becomes. The accuracy can be as low as 1 kilometer, it depends on the cellular signal available.
- q) In our experience since 2009, when an individual is outdoors and in motion, we see GPS points successfully established once per minute and with a high degree of accuracy that show them clearly on the expected path of travel - for example in a continuous straight line on the expected lane of travel of a roadway or sidewalk. When the individual is indoors for an extended time, we see a pattern of points clearly centered on and around the expected building or area.
- r) Expected variations in accuracy and completeness do not compromise the system's capacity to monitor compliance with typical geographic restrictions and to establish a record of the wearer's movements. If there are specific questions or concerns about how accuracy and completeness may impact a particular case, we would be happy to address them.
- s) Our Monitoring Device has been utilized to monitor Participants across Canada including but not limited to:
- Travis Vader
 - Omar Khadar
 - Jimmy Truong
 - Jamal Borhot

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

Prime Mobile R4

Our SafeTracks Domestic Violence/ Intimate Partner Violence and or Witness Protection program, is where we use our Prime Mobile R4 Emergency Duress Device for these specific cases. In some instances, the Crown or the Court are hesitant to release individuals where there are serious concerns regarding the Safety of Victims of Domestic Violence/IPV or Witnesses. Integrating our Prime Mobile R4 into the release plan will again provide Crown and or Court, with enhanced confidence to release as your plan has considered the Safety of Victims or Witnesses.

The Prime Mobile R4 combines the value of GPS technology, 2-Way Hands-Free Voice with an integrated SOS button, all in one easy to use and proven package. With the push of the SOS Button, it will connect the identified person directly to our SafeTracks Emergency Call Center. Our professional certified Emergency Operators will assess the situation and respond accordingly with Police.

SafeTracks GPS Ankle Bracelet Technology – Concerns and or Consequences

- It is our understanding that, in bail cases, courts will be considering Electronic Monitoring in two distinct stages - firstly, as part of the court's assessment of whether a proposed plan sufficiently mitigates case-specific concerns and, secondly, if the court makes a release order, deciding what conditions are appropriate. This section is intended to assist in both of those stages and their counterparts in other contexts, such as conditional sentences, peace bonds, early release, and immigration release.
- Electronic Monitoring cannot prevent flight or non-compliant behaviour, nor can it guarantee any specific police response time. Where we present information about typical response times, it is provided for completeness, but we do not recommend that decisions be based on an expectation of any specific police response time. The ultimate police response time can vary due to a number of factors, including technical or human factors delaying the time between the event, the system's communication of an alert, the steps taken between the time the alert is received and making a report to police, police priorities at the time of the report, and time necessary for police to arrive on scene. In other words, in our view, it is not practical to see Electronic Monitoring's risk mitigation impact as deriving from any ability to stop a person from fleeing or committing an offence that endangers public safety. Consistent with our reading of the case law, we recommend that monitoring's impact be assessed in terms of its expected deterrent effect on a specific Participant person in relation to specific behaviours of concern and in terms of its ability to provide early detection and objective reporting of violations.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

- When the court determines that there is a risk that a Participant could remove an SafeTracks GPS Ankle Bracelet in order to flee the jurisdiction or commit an offence, an important consideration is that no matter how rapid the police response may be, it cannot be relied on to be rapid enough to locate and apprehend them.
- When the court determines that a Participant presents a risk to commit offences that endanger public safety, the following considerations may be helpful to bear in mind.

GPS Monitoring as a Standalone Condition:

- As a result of the deterrent effect of the wearer knowing that a record is being kept of their location, to the extent that the court determines that such an effect can be expected to be operative in a specific case, GPS monitoring may offer risk mitigation value independently of other conditions such as a curfew or house arrest.

GPS Monitoring complete with Geo-Zone based restriction, such as a Curfew or House Arrest, with NO Exceptions:

- When a court determines that compliance with a house arrest or curfew condition is necessary to mitigate risk, GPS monitoring may support such conditions by bolstering the likelihood of compliance and reducing the risk associated with the possibility that the Participant was to breach such a condition. SafeTracks monitoring Centre through their protocols per participant, can and will contact local police if required, and advise them of the Breach and request they are dispatched.
- In some cases, using GPS monitoring may allow for consideration to be given to defining a “remain within” zone that is larger than the residence - for example, an area around the residence that enables walking and basic errands. Overlapping zones with schedules can also be considered, such as a curfew during overnight hours and a window of time during the day when movement is permitted within the larger zone.
- Our GPS solutions will generate alerts when zone-based restrictions are violated. Our protocols state that we, if required, will contact the Police of Jurisdiction, and advise them that the Participant has Breached a Condition of their Release. All we can do is request them to dispatch.

Exceptions - Surety Accompaniment, Work, School, etc:

- Whether an exception to a Geo-Zone-based restriction such as a House Arrest is Permissive, or Mandatory will affect the method and timing of how we detect and report non-compliance.
- **If an Exception is Mandatory** – for example requiring that the Participant be at a specific work location during certain hours – we are able to set up a zone-based restriction that will result in violations being detected and reported in the same way as described above for violation of a house arrest or curfew.
- When zone-based conditions have permissive exceptions, such as permitting the Participant to leave the residence in the company of a surety, or for specific purposes such as work or school, this will mean that a zone-based alert is not sufficient to detect non-compliance and may create the

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

possibility that non-compliance will go undetected, that detection and reporting of non-compliance will be delayed, or that further police investigation may be needed. Common examples are:

- a) **Special purpose exceptions such as work, school, meetings with counsel, medical appointments:** For these types of exceptions, only a manual review of the Participant's actual GPS tracks will be able to compare where they went with the permitted purpose. We do not follow movements in real-time during a leave nor do we review the tracks immediately once the leave ends.
- b) **Directly to and from/defined travel corridors:** Where consideration is being given to accompanying a permissive exception with a requirement that the Participant "travel directly to and from" the permitted location or that they only travel within a defined travel corridor, there are a few considerations that we suggest being borne in mind. The GPS records will show brief deviations such as stopping for gas or going through a drive-thru, so we suggest that consideration be given to whether such deviations are to be treated as breaches of a "directly to and from" requirement. When a permissive exception is accompanied by a defined travel corridor, we will create a zone reflecting the corridor's boundaries; however, if there are other concurrent exceptions, the manual review described above may still be required.

GPS – Police Targeted Exclusion Geo-Zones:

- At the request of police, we will set up "informational" zones that do not correspond directly with movement restrictions, but that will alert police automatically via text message and/or email to the Participant's movements. For example, we have done this where the police wish to be alerted if the Participant enters a certain area.

GPS – Exclusion Geo-Zones

- When terms require that the Participant is not to enter a defined area, we will set up an Exclusion zone that will result in violation alerts. SafeTracks monitoring centre will contact the Police of Jurisdiction and request to be dispatched.
- When creating specific Exclusion Geo-Zones conditions, we suggest that consideration be given to whether exceptions are appropriate such as driving through the area on a main thoroughfare without stopping or attending court or other permitted locations within the zone.
- We sometimes see terms prohibiting the Participant from being within a defined distance of places where named people live, work or attend school, without specifying the associated addresses. Without those addresses, we cannot create zones that will alert us to violations. The GPS record will be available to police for investigation of possible violations. If the police provide us with the addresses, we will create corresponding zones.

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

GPS – Apartment Buildings or Offices:

- When a Participant lives in an apartment building, it should be borne in mind that the GPS monitoring cannot determine where the Participant is within the building. We suggest that consideration be given to whether the home inclusion zone is defined as the apartment unit, the building, or a defined area around the building. When the terms require that the Participant remain within the apartment unit, we will add a radio-frequency component (called a Beacon) that will work in conjunction with the GPS SafeTracks GPS Ankle Bracelet to monitor the Participant's presence in the unit.

SafeTracks – Court Ordered Release Conditions – Suggestions:

SAFETRACKS provides these terms for the convenience of the Court and counsel. We will monitor in accordance with any terms ordered by the Court. These terms are for GPS monitoring - please adapt as needed for other forms of monitoring. We are available to assist in the drafting of monitoring-related terms.

- YOU SHALL BE SUBJECT TO A GPS ANKLE BRACELET AND MONITORING BY SAFETRACKS GPS CANADA (SAFETRACKS). THE ANKLE BRACELET SHALL BE INSTALLED BY A SAFETRACKS REPRESENTATIVE PRIOR TO YOUR RELEASE FROM CUSTODY.
- YOU SHALL ENTER INTO THE SAFETRACKS GPS ANKLE BRACELET ELECTRONIC MONITORING PROGRAM, WHICH INCLUDES AGREEING BY SIGNATURE TO THEIR CONTRACT, RULES AND PROTOCOLS, AND CONSENTING TO THE RELEASE OF ALL PERSONAL INFORMATION AGREEMENT. YOU SHALL COMPLY WITH ALL TERMS OF THESE AGREEMENTS, INCLUDING BUT NOT LIMITED TO:
 - WEARING A SAFETRACKS GPS ANKLE BRACELET AT ALL TIMES
 - COMMUNICATING WITH SAFETRACKS REPRESENTATIVES
 - PERMITTING SAFETRACKS REPRESENTATIVES INTO YOUR HOME TO INSTALL, MONITOR, AND MAINTAIN EQUIPMENT
 - COMPLYING WITH SAFETRACKS BATTERY CHARGING REQUIREMENTS
- YOU SHALL PROVIDE A COPY OF THIS RELEASE ORDER TO SAFETRACKS FOR THE PURPOSES OF ENSURING COMPLIANCE WITH THIS ORDER.
- YOU SHALL PROVIDE THE NAME OF YOUR PROBATION OFFICER TO SAFETRACKS WITHIN 3 BUSINESS DAYS OF HAVING ONE ASSIGNED TO YOU.
- IF FOR ANY REASON THE SAFETRACKS ANKLE BRACELET EXPERIENCES MAINTENANCE OR TECHNICAL ISSUES, YOU SHALL TURN YOURSELF INTO THE CLOSEST RCMP DETACHMENT OR POLICE STATION ON THE REQUEST OF SAFETRACKS REPRESENTATIVES IMMEDIATELY, UNTIL THE ISSUE IS CORRECTED. YOU SHALL NOT TAMPER WITH OR REMOVE THE SAFETRACKS GPS ANKLE BRACELET WITHOUT PRIOR JUDICIAL APPROVAL AND OR BY SAFETRACKS REPRESENTATIVE. FOR GREATER CERTAINTY, THE SAFETRACKS GPS ANKLE BRACELET MAY BE REMOVED IF YOU ARE PLACED BACK

Being proactive today, not reactive tomorrow.

www.SafeTracksGPS.ca

IN THE CUSTODY OF POLICE OR OTHER REMAND OR CORRECTIONAL FACILITY.

- YOU MUST LIVE AT YOUR APPROVED RESIDENCE ----- . ANY CHANGES IN YOUR ADDRESS MUST BE APPROVED IN WRITING BY YOUR PROBATION OFFICER, AND YOU MUST NOTIFY SAFETRACKS IMMEDIATELY.
- YOU MUST KEEP A CURFEW AND REMAIN IN YOUR HOME OR ITS GROUNDS 24 HOURS A DAY, 7 DAYS A WEEK. THESE EXCEPTIONS APPLY TO THE CURFEW RESTRICTION:
 - MEDICAL OR OTHER EMERGENCIES FOR YOU, YOUR SURETY, OR YOUR FAMILY.
 - TRAVEL TO, FROM AND WHILE REMAINING AT WORK, EDUCATION OR VOCATIONAL TRAINING. YOU MUST PROVIDE IN ADVANCE TO YOUR PROBATION OFFICER A COPY OF YOUR WORK /EDUCATION/TRAINING SCHEDULE FOR AT LEAST ONE WEEK, WITHIN ONE BUSINESS DAY OF YOUR PROBATION OFFICER'S REQUEST.
 - ANY OTHER EXCEPTION APPROVED IN WRITING BY YOUR PROBATION OFFICER.
- PRESENT YOURSELF AT THE DOOR WHEN REQUESTED BY POLICE, SAFETRACKS AND OR ANY OF THEIR AGENTS. AND MUST FOLLOW ALL DIRECTIONS OF ANY OF THESE REPRESENTATIVES.
- YOU ARE BANNED FROM ALL AIRPORTS, HELIPOINTS, AND AN EXCLUSION ZONE WILL BE CREATED TO IDENTIFY POSSIBLE BREACHES.
- THE COURT WILL PROVIDE SAFETRACKS WITH THE NAME AND CONTACT INFORMATION OF THE INTERESTED PARTIES WHO WISH TO BE NOTIFIED OF ALERTS AND BREACHES SO THAT SAFETRACKS MAY REPORT ON ANY ALERTS AND BREACHES TO THOSE INTERESTED PARTIES. INTERESTED PARTIES MAY INCLUDE: THE ARRESTING OFFICER/S, THE SUPERVISING OFFICER/S, THE PROBATION OFFICER, THE CROWN PROSECUTOR, THE DEFENSE COUNSEL AND THE SURETY.
- FOLLOWING THE INSTALLATION OF THE ANKLE BRACELET ON MY PERSON, I AGREE TO TRAVEL DIRECTLY TO MY COURT ORDERED RESIDENCE AND NOT TO MAKE ANY STOPS ON THE WAY TO THAT RESIDENCE. I UNDERSTAND THAT THE COURT ORDERED RELEASE DOCUMENT IS IN EFFECT FROM STARTING AT THE TIME THE ANKLE BRACELET IS INSTALLED AND I LEAVE THE DETENTION CENTER.

PLEASE NOTE: FROM THE TIME WE RECEIVE THE SIGNED COURT ORDER, INSTALLATION AND RELEASE WILL BE 48 HOURS OR LESS, MONDAY TO FRIDAY ONLY.

IF THE PARTICIPANT FAILS TO MAKE ANY PAYMENT OR CAUSES DAMAGES TO THE EQUIPMENT, THE SURETY ASSUMES RESPONSIBILITY FOR RENUMERATION TO SAFETRACKS. ADDITIONALLY, THE PARTICIPANT SHALL IMMEDIATELY SURRENDER THEMSELVES TO THE NEAREST POLICE STATION UNTIL THE ACCOUNT IS MADE CURRENT.

Being proactive today, not reactive tomorrow.
